

Instead of cutting on spending on your baby's health, cut the spending on furniture by buying a desk that grows- LWiki

OUR DESK THAT GROWS

We are a family-run company dedicated to the production of children's furniture. Our flagship product is a growing desk, which adjusts to the height of your baby, so that he or she can maintain a correct posture while sitting at his desk.

All of the unique technical solutions used in our desks are legally protected by a registered industrial design and are patented by our company. Thanks to that, our products fully retain their functionality and attractive price.

The growing desk can be ordered in any size in the range of the depth of the worktop 50-80 cm and width 80-160 cm

The desk is made from the highest quality melamine panels produced by leading manufacturers, and thanks to the wide range of colours available, it perfectly fits into any interior.

All the growing desks have a 10-levels adjustment starting at 52cm for a child aged 3 years and ending at 73cm tall which corresponds to adult desks.

Some selected desk models feature a 6-levels tilt adjustment, which improves the correct child's wrist movement and facilitates creative work at the desk.

A wide range of desk models gives you the opportunity to customize it to your personal needs and expectations: any number of drawers, shelves, various types of handles and edge finishes.

We look forward to a successful working relationship in the future.
