RASZYN, January 1st, 2020

We are family company. We manufacture furniture for corporate and individual customers. Digital processing and automated production allow us to meet all quality and quantity expectations of our customers. Our experience has created an adjustable desk that is adapted to the growth of users of all ages. This is a new patented product on our market. The adjustable desk is produced exclusively by our company. The desk design is subject to legal protection. The product is dedicated to a wide spectrum of customers taking into consideration the youngest generation aged three and employees in the full height range up to 215 cm

“Nobody wants to scrimp on health, but one can scrimp on furniture, buying adjustable desk LWiki”

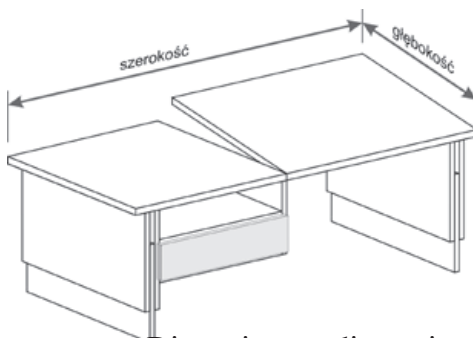

We look after correct posture.

What characterizes our product ?

The desk is designed for children aged at least three years old , preschoolers, schoolchildren, junior high school students, students, office workers and people with physical disabilities. Each of us is of a different height, the desk should also match us up. The right height of the desk ensures correct posture and prevents injuries during long hours of sitting time.

Discretionary dimension

All adjustable desks possess a 20-step height adjustment . The adjustment range starts from 52 cm. This is the ideal desk height for children aged 3 and up to a height of 82 cm, i.e. the height of a standard desk for an adult height of 215 cm.

Selected models of adjustable desks have a 6-step table top adjustment. A larger number of settings gives the customer the ability to adjust the angle of the table top to his own needs. Setting the table-top tilt angle is important for the proper development and operation of our wrist. Settings that are used: 5 degrees for writing, 10 degrees for drawing, 15 degrees for reading.

Discretionary colour

Drawers with metal walls, metal box type. Drawers of a maximum lengths allow the placement of A3 + format. Bottom is resistant to pushing out and heavy loads . 2 types of drawer depth - regular and pencil case (yellow in the list of designs).

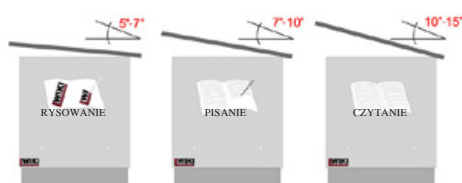

a 20-step height adjustment

An adjustable desk can be ordered in any size. The customer decides himself what dimension of the desk he needs. Proposed dimensions of desks:

- table top width 80/90/100/110/120/130 * / 140 * / 150 * / 160 * cm,
- table top depth 50/60/70 * / 80 * / 90 * cm
- *individual transportation cost assessment

A adjustable desk can be selected in any color from the available range of panels. In this way, we are able to meet the expectations of the most demanding customers. In addition, a wide selection of panels allows you to match the color of your desk to the existing furniture. That also affects attractiveness of your commercial offer. An adjustable desk is resistant to heavy loads, because melamine board is used, with high own weight approvals. We do not use paper plates of low density.

a 6-step table top adjustment.

All visible edges are topped with ABS edge.It increases the product's aesthetics and durability.

DESK HANDLES

3

CHAPTER

STANDARD HANDLES

Adjustable desks with drawers or cabinets can be equipped with handles and knob handles. The customer decides himself what kind of handles he needs.

Handles of beautiful slim line and shape are suitable for children's and youth rooms. Standard handles are included.

We offer two types in three colours:

- mat (1).
- satin (2),
- chrome (3)

Additional option rubberized handles

We offer handles especially for the youngest users of our desks, containers and cabinets. Rubber knob handles of fairy-tale shapes and colors, safe for use by children. They additionally give the appearance and character of a children's room. During adolescence, you can replace the handle with other knobs available on the market. The furniture will then have a youthful look.

EXTRA OPTIONS
